

**Susan G. Komen
Research Grants – Fiscal Year 2014**

This research grant was approved by Komen's national board of directors for FY2014 Research Programs funding. This grant will be funded upon the execution of grant agreements between Komen and the grantee institutions.

Advocates in Science Educational Program at ASCO Breast Cancer Symposium 2014

Investigator(s): Elda Railey

Lead Organization: Research Advocacy Network

Grant Mechanism: SPP

Grant ID: SPP140007

Public Abstract:

The program offers the opportunity for selected AIS member to participate in a class that will prepare them for attendance at the 2014 Breast Cancer Symposium (<http://breastcasymposium.org/>) and to disseminate the research results back to Komen affiliates and the breast cancer community. The Symposium offers a world-class multi-disciplinary faculty and an accessible setting. Past AIS participants have found this be an excellent learning opportunity and the perfect venue to learn more and interact with scientists and clinicians that are working to incorporate the latest science into clinical practice.
